

## Speed Lock® CF HD

Tripod, Heavy duty, Carbon Fiber

The Speed Lock® CF is the fastest two stage tripod in the world! Simply release the three easy to reach clamps and the Speed Lock® CF is ready for action. This extremely sturdy and twist-resistant carbon fiber tripod ensures that you're already shooting while the others are still setting up.

It takes just three quick movements and the Speed Lock® CF is ready for action – and users don't even have to bend over! The patented clamping system lets you adjust the tripod smoothly and safely, even with a camera mounted. The Speed Lock® CF's carbon fiber construction ensures minimal load-free weight, and increases stability and twist resistance. On top of that, the clamping connection forms a third tube to further increase stability. The ergonomically shaped, high-tech clamps have a rounded design which ensures that cables slide off without catching. In addition, you can tell at a glance whether the legs are clamped into position. The Speed Lock® CF weighs less than 3 kg / 6.6 lb, only a couple of hundred grams more than the ENG 2 CF, highly favored by camera crews all over the world. And if you need strength, the HD model has an amazing clamping force of 95 kg / 209 lb. These tripods are, of course, compatible with all existing 100 mm accessories.

### Technical Facts
