

## EFP 2 D

Tripod, Aluminium

Like other tripods in the outstanding EFP series, the EFP 2 D is a 150 mm double extension tripod that features fast-action clamps. In addition to the ground spreader, an adjustable mid-level spreader is also available. The EFP 2 D is extremely stable because it uses twin tubes which stretch from the top right down to the bottom. The EFP series, as evident from its name, is especially suited to electronic field production.
