

## Vario Pedestal 2-75 incl. 6 trim weights, pump

We've thought of everything! Do you need to change heads? A column latch and Quickfix attachment make this even faster. And fast vertical panning is also child's play with the Vario Peds' friction damping systems. In addition, the crab-and-steer function enables simple maneuvering with defined rolling turns. In order to enable balancing during the shoot – for example in case of sudden temperature change – the steering wheel has easily accessible slots for the balance weights that are a standard accessory. Narrow clearance is not a problem, as the dolly arm positions are easy to adjust. And, of course, the power cable features extra padding to protect it from being crushed. The steering wheel, column, and dolly quickly disassemble for transport.

### Exceptional Safety

Vario and Studio Peds operate with air-filled columns, making them far safer than gas-filled pedestals. In addition, a pressure relief valve prevents damage caused by overpumping. An air pump is provided as a standard accessory.

### Advantages of the Vario Pedestal:

- safe air changing with pump or compressor
- pressure relief valve prevents damage to the column
- low operating costs due to air charging
- Crab & Steer function for easy maneuverability and defined cornering
- optional retrofit kit for conversion to Studio Ped
- Quickfix enables fast camera changeover from pedestal to tripod
- column, handwheel and dolly dismountable for easy transport

### Technical Facts

Recommended for	fluid heads Video 90; Video 25 Plus, Video 60 Plus and Video 75 Plus (with #3914)
Weight	55 kg / 121 lbs
Payload	75 kg / 165 lbs
Height range	66 - 143 cm / 26.0 - 56.3 in
Lift	77 cm / 30.3 in
Clearance	69 - 92 cm / 27.2 - 36.2 in
Head fitting	flat base, Quickfix
