TH2817

Brief Introduction

■ TH2817 LCR meter is an impedance measurement instrument with high accuracy, wide measurement range, 6 selectable typical frequencies (100Hz, 120Hz, 1kHz, 10kHz, 40kHz, 100kHz), and 3 test levels (0.1V, 0.3V, 1.0V). It can be used to measure many parameters, including inductance L, capacitance C, resistance R, etc. Combining strong functions, good performance, and easy operation, the meter can be used for high-speed measurement on production line and high-accuracy measurement in laboratory. HANLDER and RS232C interfaces help build an automatic component sorting system and communicate with computer. And measurement conditions can be sent to printer through printer interface. TH2817 LCR meter offers good performance at a low cost.
