## B. TH2829X Series Automatic Transformer Test System

### TH2829X Series

#### Features

- 7-inch 16:9 TFT LCD display with a resolution of 800×480
- Simple and elegant appearance
- Easy and flexible panel operation
- Up to 1MHz test frequency, 0.5mHz resolution
- Signal amplitude range: 5mV to 10Vrms, 100 $\mu$ V resolution
- Test speed is up to 75meas/sec.
- Wider impedance test range and better stability for small-signal test
- Built-in 0-100mA/0-10V bias source (standard) or 1A bias source (optional)
- Diode P/N characteristic detection can test all parameters of network transformer.
- Improved high turn ratio and weak coupling transformer test ability
- Improved DCR test ability for low-ohm winding
- One screen is enough to show all test results.
- To display one or two groups of primary and secondary parameters is selectable in LCR test.
- Compatible with TH1901 and TH1805 20-pin transformer scanning fixtures
- Flexible time-labeling system: time of file setting, calibration and deduction can be saved.
- Sort the selected scanning parameters
- Self-test scanning fixture relays and ensure they work well.
- Flexible deviation and deduction modes
- Multiple handling ways for FAIL cases
- Single parameter test cycle can be used to test a separate winding.
- Two separate passwords for administrator and operator can improve test security and reliability.
- Internal memory for up to 200 setting files and external USB memory for more
- Test data and graphs can be saved as CSV, GIF format to USB memory.
- The built-in software provides analysis abilities, such as Cpk, Cp and Ck.
- Bar-code reading function can be used to select a setting file or to manage the type of test products.
- Search functions such as file search, fuzzy search, accurate search, code-bar search are available.
- Parameter setting files are compatible with TH2818X/TH2819X.
- To program setting files through PC
- To upgrade operation softwares of USB HOST and RS232C online
- Multiple interfaces are optional for PC communication.
- To network multiple testers through LAN interface

#### Brief Introduction

Most switching transformer and network transformer manufacturers have an urgent need for a transformer test system that can achieve more functions, high efficiency and accurate test. On the basis of thorough market research and analysis, advanced impedance test technology and rich experience on the development of TH2818X&TH2819X automatic transformer test system, Tonghui has launched a new series of automatic transformer test system—TH2829X series which combines faster test speed, higher accuracy and efficiency. TH2829X will be a great assistant for your transformer tests.

# Transformer, Motor and Winding Test Instruments

## B. TH2829X Series Automatic Transformer Test System

|                               |                         |   |
|-------------------------------|-------------------------|---|
| Interface                     | Control interface       | HANDLER (optional) on rear panel<br>SCANNER(compatible with TH1901A/B, TH1805A/B transformer scanning fixtures) |
|                               | Communication interface | LAN, GPIB (optional), USB HOST, RS232C  |
|                               | Memory interface        | USB HOST (USB memory or bar-code scanning)  |
| <b>General Specifications</b> |                         |   |
| Operating environment         | Temperature             | 0° C – 40° C,   |
|                               | Humidity                | ≤ 90%RH   |
| Power supply                  | Voltage                 | 99V-121V AC, 198V-242V AC   |
|                               | Frequency               | 47Hz – 63Hz   |
| Consumption                   |                         | Max. 80 VA  |
| Dimension (W×H×D)             |                         | 430mm×185mm×473mm   |
| Weight                        |                         | Approx. 13 kg   |

### Specifications for TH1901A/B, TH1805A/B scanning test fixtures

**TH1805A/B**

**TH1901A/B**

|  |                |  |
|--|----------------|--|
| Output-pin   |                | 20-Pin   |
| Soft-pin output  |                | Pin1, Pin20, Pin10, Pin11 are used to test 4 transformer soft-pins                           |
| distributed capacitance of scanning output-pin                             | TH1901A/B      | 2.0pF—6.0pF  |
|  | TH1805A/B      | 1.0pF—2.5pF  |
| Transformer locking mode   | TH1901ATH1805A | Pneumatic  |
|  | TH1901BTH1805B | Manual   |
| Control test on panel  |                | START, RESET, PASS/FAIL LED indicators   |
| Input/ output signals on Handler interface (output from scanning fixtures) |                | Power: +5V,GND<br>Input: START, RESET    Pass/Fail signal<br>Output: PASS, FAIL    TTL level |
| Working power output of magnetic valve                                     |                | +24V   |
| External start mode  |                | Foot switch  |
| TH26016 scanning control interface   |                | 30-pin scanning control connecting cable   |
| Working temperature and humidity   |                | 0° C-40° C, ≤ 90%RH  |
| Dimensions (W×H×D)   | TH1901A/B      | 270mm×186mm×62mm   |
|  | TH1805A/B      | 270mm× 230mm×62mm  |
| Weight   | TH1901A/B      | Approx. 3.1kg  |
|  | TH1805A/B      | Approx. 3.6kg  |

### Ordering Information

TH2829AX/TH2829BX/TH2829CX Automatic Transformer Test System

### Instrument Accessories

TH26005B 4-terminal test fixture  
TH26011A 4-terminal Kelvin test clip leads  
TH26004B 2-terminal test clip leads

TH26016 Transformer scanning control cable  
TH1901-001 Foot switch  
TH26010 Gilding short board  
TH1901B Manual transformer scanning fixture
